

On August 7, 2018 First Community Bank will be implementing a new Internet Banking system. The new system is more user friendly and has some new functionality. As we transition to our new Internet Banking system here are a few tips to make the transition smoother.

1. *If you use our current Internet Banking system only:* When you log in to the new system you will use your current Internet Banking user ID and password. You will be asked to validate some of your information. Once validated you will be required to create a new password.
2. *If you use both the current Internet Banking system and our FCB Now app:* On your first login you will need to use the Internet Banking user ID and password. You will be asked to validate some of your information. Once validated you will be required to create a new password.

(By following these steps your bill pay history and payees will be moved over to the new system.)

3. If you use only the FCB Now app there will be no changes to your log in ID and password.

Community Connection Services Users

Please contact Robert Briones at 956-276-5658 to receive your customized login information.

For Quicken/QuickBooks/Mint users we have created a temporary web page on our website to help you change your setting to work with the new system. On our home page under "Useful Links" on both "Personal Banking" and "Business Banking" look for a link labeled "Intuit Users".

Thank you,
First Community Bank
